**Incoming Deliveries**

Unless you have another specific agreement in place, each scoured lot needs to be clearly identified and submitted with a completed Customer Scouring Instruction Form or your own written work order, which will ensure that we follow your instructions and also that we have correctly identified your scoured product for downstream processing.

Unidentified bales/bags will cause delays in the process or may prevent processing.

All incoming jobs need a document which clearly identifies the job and provides a net weight of the wool to be scoured. In the absence of a weight list, all incoming bales/bags will be check weighed at a cost of £1.00 per bag prior to scouring.

This is to ensure that you are invoiced correctly and that we can measure the yield of your processing.

**Processing Environment**

HSC ensures that your fibre is processed in an environment which meets prevailing regulatory requirements, including those from the Environment Agency and Yorkshire Water.

HSC can offer scouring to GOTS Organic requirements. We are also working with our suppliers to look to provide a low impact process to our valued customers.

Should you have specific initiatives we would be happy to work with you to realise your expectations and those of your customers.

HSC have invested heavily into internal competence and we strongly believe that this gives you an ideal and unique opportunity to promote your fibre based on the processing environment that we operate in.
